

Meet students where they are

free and low-cost technologies that support college & career readiness

Against a backdrop of competing priorities, you're charged with providing a high-quality education to the learners you serve. And over and over again, you rise to that challenge.

Leaders like you partner with The NROC Project (NROC) to imagine, develop, test, and refine technologies that improve learner readiness, retention, and success.

Technology can't—and shouldn't—replace the human art of teaching, but it can help you effectively individualize instruction at scale. Every student can benefit from personalized support, whether they're rising to grade-level expectations, transitioning to a new grade, preparing for college or career, or working to earn a credential that will give their family fresh opportunities.

If you're searching for ways to more effectively honor the unique needs of every learner, we want to partner with you.

TOOLS

Tools deliver web-based learning experiences.

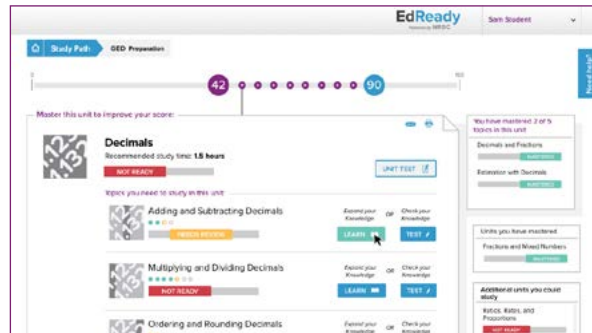

No student should be labeled remedial, just as no student should be assumed to be perfectly prepared.

What do you want your students to be ready for?

EDREADY SUPPORTS:

- ✓ Grade-to-grade transitions
- ✓ High school completion
- ✓ College and career readiness
- ✓ Low-stakes, formative assessment / college placement alternative
- ✓ Corequisite education
- ✓ HSE / GED, CASAS, TABE, or NRS preparation
- ✓ Teacher preparation
- ✓ Something else entirely? We're here for your big ideas.

EdReady, an adaptive, personalized learning system, meets students where they are and helps them address knowledge gaps that could otherwise limit their access to future academic and workforce opportunities.

Once a student engages with EdReady's initial diagnostic assessment, the application builds them an individualized study path that empowers them to skip the math and / or English concepts they already understand and accelerate their mastery of the concepts they need to know.

Effectively
individualize
instruction
at scale.

Goals

Each EdReady goal can support a unique, student-focused readiness experience. EdReady can accommodate a variety of goals, depending on your needs.

Scope

You can tailor study paths and embedded diagnostics to support programmatic needs within a customized scope of expectations.

Resources

A personalized study path with topic-specific, media-rich learning resources will guide your students toward their goals. You can choose which curated resources your students will see.

Data Access

You can set permissions for live student data dashboards and downloads for teachers, administrators, and counselors.

Readiness

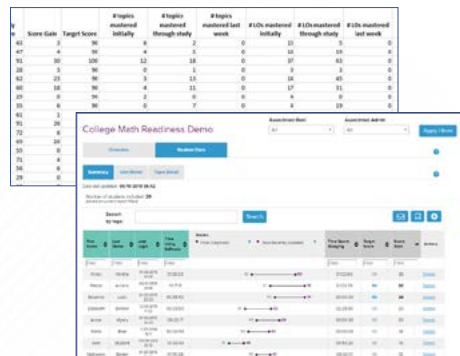

As students meet or exceed their target scores, you can direct them toward additional steps they may take on their journey to academic and personal success.

Watch an introductory video.

NROC.org/EdReady

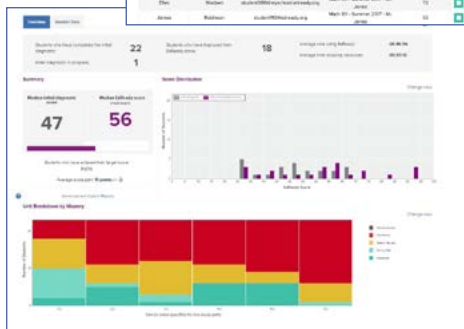

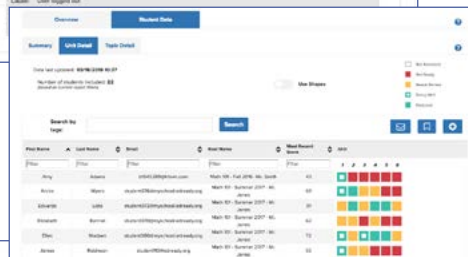

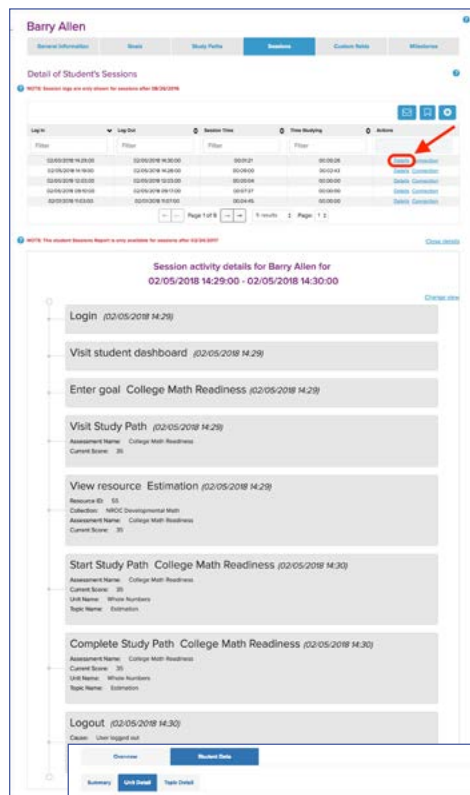

EdReady captures and graphically displays student- and cohort-level, real-time performance data. Uncover student learning trends and understand when and what types of instructional interventions will benefit your students.

EdReady frees educators to do what only they can do: effectively engage students in the human art of learning. We know that inspired students are more likely to persist and succeed, so EdReady + educators = big personal, institutional, and societal wins.

EDREADY EMPOWERS YOU TO MONITOR:

- ✓ Student engagement (or lack thereof)
- ✓ The concepts that students know today and what they need to master to achieve their goal
- ✓ Details about how students are using their time, including taking advantage of the embedded study resources
- ✓ Key activity indicators that highlight which students may be struggling to effectively use the platform
- ✓ Current mastery status across a cohort, enabling you to quickly see what concepts could be reinforced by additional instruction (Not Ready, Needs Review, Doing Well, and Mastered)
- ✓ Student persistence and success

YOUR BENEFITS

What's in it for you

✓ Customization

We work with districts, systems, and states to build customized personalized learning solutions.

✓ Student data

Access real-time student performance analytics.

✓ Implementation support

Benefit from step-by-step guidance, regular office hours, and one-on-one meetings.

✓ Implementation resources

Take advantage of learning management system (LMS) installation files, assessments, course / media metadata, and instructor guides.

✓ Technical assistance

Leverage NROC's searchable knowledge base, peer-to-peer discussions, and web ticket-based technical support.

PRICING? IT'S SIMPLE.

Engagements are calculated based on the size of the institution, state, or system and the scope and complexity of the implementation. **Contact us for a quote.**

OUR COMMITMENTS...

EQUITY, ACCESSIBILITY, & SECURITY

On Equity

We believe that all students should have access to high-quality educational opportunities. Educational equity—the idea that systematically disenfranchised and underrepresented students deserve fair and inclusive treatment—is a lens that we apply to our mission-based work.

We rally behind and build curricula and tools that strengthen college and career readiness because we know that postsecondary education often improves career trajectories, positively disrupting the cycle of generational poverty and its associated ills.

We don't think NROC is *the answer*, but we consistently aim to be part of the solution. From design ethics to partnerships, educational equity drives our organizational priorities.

On Accessibility

We're committed to providing accessible educational experiences to the widest possible audience, regardless of any person's technology or ability. We're actively working to increase the accessibility and usability of our courses and tools, and we adhere to the Web Content Accessibility Guidelines (WCAG 2.0).

On Security

We take data protection and access seriously. EdReady employs best practices in data security, and only the minimum possible amount of personally identifiable data (PII) is acquired by default. We maintain a System and Organization Controls (SOC 2) certification with AICPA, a cybersecurity risk management authority.

OUR COMMITMENTS...

For individuals, the courses and tools we create are OER...

“Open Educational Resources (OER) are teaching, learning and research materials in any medium—digital or otherwise—that reside in the public domain or have been released under an open license that permits no-cost access, use, adaptation and redistribution by others with no or limited restrictions.” – *UNESCO*

Our sustainability model allows NROC to...

- ✓ Support and redistribute OER
- ✓ Build and maintain platforms for enabling people to find, adapt, and share OER and engage in open educational practices
- ✓ Devote significant time and energy to improving learning outcomes, with special attention to college and career readiness
- ✓ Remain committed to NROC institutional members for the long term, fulfilling the promise of OER

A close-up photograph of a woman with dark, curly hair and red-rimmed glasses, smiling broadly and hugging a person with long, wavy blonde hair from behind. The woman is wearing a red top and large, ornate earrings. The person being hugged is wearing a red top. The background is a soft, out-of-focus blue and white.

“I’m a mom, and I’m a grandma, but I never finished high school. And, the biggest reason for that is that I was totally intimidated by math. After having participated in the program EdReady, I have exceeded my own expectations and overcome fears in algebra.”

— Latonia McGruder, student, Fairfield-Suisan Adult School

WHO WE WORK WITH

Secondary

Postsecondary

Adult Education

Workforce

When your institution, system, or state becomes an NROC partner, you enjoy robust tool customization and responsive implementation and technical support.

LET'S COLLABORATE!

If you're interested in learning more about how NROC partnership can support your initiatives, contact us today. We serve individual institutions, districts, systems, and states.
